

Better Door Components.  
Better Installation.

**BETTER DOOR.**

# A better door starts with better door components.

Whether supporting durable performance, delivering unmatched features and benefits, addressing common problems, or achieving a better installation, a better door starts with better components. And at Endura Products, designing and building better door components is what we do best. Learn more about how door systems Powered By Endura components can deliver a better door experience for you.

# FUSIONFRAME®

## A door frame system that's also a door installation system.

Everything you need in a composite door frame – and more.

The basics you must have:

**A. Maintenance-free performance:**

Composite foot and exterior deliver rot-proof performance and protection against wood-ingesting insects.

**B. Prefinished convenience:**

Prefinished white option is ready to install – no additional steps required – or to be painted if desired. Textured stainable option also available, featuring a neutral woodgrain.

The improvements you want:

**C. Structural rigidity:**

With an engineered core, FusionFrame jambs and mulls support a no-fuss installation, requiring fewer shims, and provide needed rigidity to stand strong and straight over time as temperatures fluctuate – even with patio and storm-door applications.

**+ Supports varied and uncommon wall depths:**

FusionFrame can be utilized for jamb depths ranging from 4-9/16" - 8-9/16".

**+ Options, and more options:**

Unmatched product-line versatility to support a broad range of application needs with a full portfolio of jamb, mull and exterior casing options and more.

The install features you wish you had:

**1. Seamless solution for out-of-plumb openings:**

With  $\frac{1}{4}$ " of inside-to-outside "float," the brickmould adjusts to fit your needs.

**A truly mar-free installation:**

**2. Removable jamb stop cover**

allows for concealed fasteners—no need to mar the finish during install for a truly prefinished, flawless appearance.

**3. Removable brickmould cover + j-channel option** eliminate the need to drive fasteners directly into the face of the brickmould.

**4. A helping hand for a level start:**

Built-in bubble level helps get installation off to a level start with hands-free assistance.

**PANOLOCK™**

A multi-point lock for every door.

PanoLock is a one-of-a-kind multi-point lock that works with off-the-shelf hardware, supports a forgiving installation and lasting performance, and is available at a more approachable price point.

**The security and strength of a multi-point lock:**

Three secure locking points for enhanced performance and panel stability.

**Easy to live with.**

Supports a more forgiving install and smoother everyday use with tapered bolts and adjustable roller strikes.

**More approachable.**

PanoLock is available at an approachable price point so you can use it for a wider range of projects and budget needs.

## And every hardware need.

### Works with standard hardware:

Whether knob, lever or thumbpress— it works with PanoLock freeing you to:

- + Install a broad range of styles at a more affordable price point.
- + Make hardware selections when it works for you – not when you specify doors.
- + Match hardware designs on other doors.
- + Affordably and simply change hardware at any time.

## How it works:

Works with standard hardware via innovative plug-n-play latch and deadbolt adapters that mate with multiple brands and styles.

## REPLACEABLE DECK SILL®

### The solution to sill deck damage.

Looking for a solution to manage sill deck damage? Sills encounter harsh conditions throughout construction, requiring costly repair work—possibly even full door unit replacement. Tape and sill covers can help, but fail to fully prevent damage.

The Replaceable Deck Sill™ (RDS™) solves this costly problem in just a few simple steps, with tools already on hand.

One cost-cutting solution,  
two time-saving options.

- 1. Pre-installed aluminum deck.**  
Replace damaged aluminum sill deck with a flawless new one.
- 2. Construction dunnage.**  
Prevent damage with a temporary dunnage sill cap and deck during construction. Then simply install final components.

**ADAPTIVE™**

## ADAPTive Sill Series – A New Class of ADA Door Sills.

Endura's ADAPTive Sill Series raises the bar for what's possible, delivering an ADA-compliant sill solution that provides enhanced performance, unparalleled modularity and flexibility, and a full portfolio of options and new capabilities.

### Unmatched modularity:

The ADAPTive sill series utilizes a base sill design that works with various interchangeable caps and accessories to meet a wide range of application needs. Two base offerings in multiple widths are available.

- 1. ADAPTive Sill with standard cap**
- 2. ADAPTive Sill with tileback cap**

### One-of-a-kind flexibility:

The use of a simple base and interchangeable caps provides flexibility unheard of in other ADA sill products, allowing you to easily switch between a standard ADA sill and a tileback option in the field by simply changing the sill cap.

## Enhanced performance:

### **A. Sealing beak:**

The ADaptive sill series features an innovative jamb boot with a sealing “beak” that sits beneath the weatherstrip to block upward water infiltration.

### **B. Full-length caulking surface:**

An optional caulking strip provides a full-length barrier against infiltration beneath the sill, eliminating a common source of leaks (and resulting callbacks).

## More options, more capabilities:

### **C. New capabilities: sill extenders.**

The first and only ADA sill that’s designed to support the use of sill extenders for even more flexibility and options.

### **+ Full portfolio of options:**

Including continuous sidelite configurations, jamb boot with sealing beak, multiple mull boots, sill extender options and more.

# VERSAPAN®

## Flexible protection, easy installation.

Versapan is a flexible sloped sill pan that provides unmatched adaptability, lasting protection against damage and can be installed in a few simple steps.

Installed in the rough opening, VersaPan™ drains water down and away from the door unit, protecting against water intrusion and associated rot and mold, saving you time and money from costly repairs down the line.

## Coverage as easy as 1-2-3.

VersaPan's flexible design adapts to each opening for a custom fit and intuitive installation. Need coverage for larger openings? Simply combine two or more sill pans.

**1. FIT.**

**2. SECURE.**

**3. COVERED.**

## VersaPan works for you.

Fights infiltration.

- 1. **Back Wall** deflects wind-blown infiltration.
- 2. **Sloped Design** drains water down and away from the opening.
- 3. **Side Walls** fit securely against the edges of the opening, preventing water penetration.

Improves aesthetics.

- 4. VersaPan accepts decorative nosing for a cohesive, polished appearance for your door system.

Built-in measurement aids.

- 5. Built-in measurement markers further simplify installation.

## Z-ARTICULATING CAP SILL®

### A Door Sill That Never Needs Adjustment.

The Z-Articulating Cap Sill™ (Z-AC) is the industry's only composite sill that never needs adjustment and features built-in sealing components to prevent performance issues and service calls, even if install isn't perfect and as conditions change over time.

**Best Window & Door Product**  
2016 Best of IBS Awards

**Tight margin:**  
Sill cap compresses for smooth operation.

**Loose margin:**  
Sill cap rises to prevent leaks and drafts.

Z-AC's sill performance doesn't stop at the cap.

**Works with no corner pad:**  
Z-End Base™ provides protection against water infiltration.

**Works with wide margins:**  
Z-End Base™ seals even with wide margins.
